Sustainability in Hydropower

4<sup>th</sup> International Conference on  
**Sustainability in Hydropower**

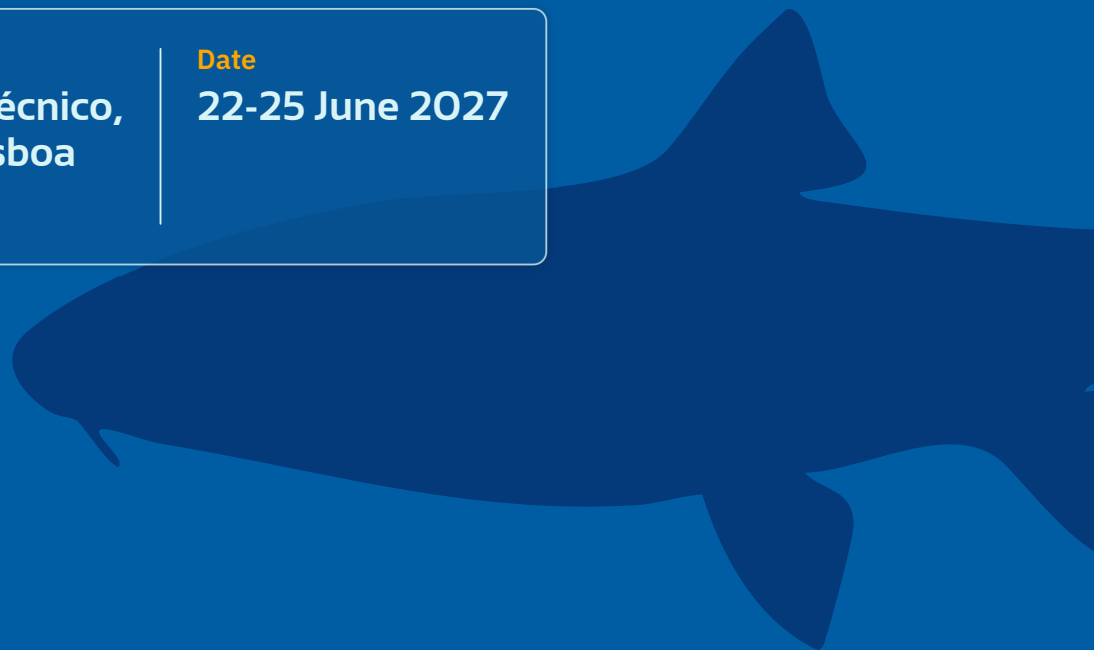

FlowForward: Rethinking  
Hydropower to Safeguard Rivers and  
People in a Changing World

**Venue**

**Instituto Superior Técnico,  
Universidade de Lisboa**  
Lisboa, Portugal

**Date**

**22-25 June 2027**

## Sustainability in Hydropower

The 4th International Conference on Sustainability in Hydropower (**SUSHP 2027**) will take place from **22–25 June 2027** at Instituto Superior Técnico, Universidade de Lisboa, Portugal, bringing together the global community working to advance sustainable hydropower in harmony with rivers, ecosystems, and society.

Since its launch in Vidsele (2019), followed by successful editions in Trondheim (2023) and Vienna (2025), the SUSHP conference series has grown into a leading international forum at the intersection of hydropower, ecology, and social responsibility. It provides a unique platform for researchers, industry leaders, utilities, policymakers, consultants, river

basin managers, NGOs, and technology providers to collaborate, share knowledge, showcase innovation, and shape the future of sustainable water and energy systems.

Under the 2027 theme, "**FlowForward: Rethinking Hydropower to Safeguard Rivers and People in a Changing World**", the conference will explore forward-looking solutions that balance renewable energy production with biodiversity protection, climate resilience, and community well-being. The program will feature plenary talks, thematic sessions, workshops, and field visits, highlighting cutting-edge research, practical tools, and real-world case studies.

## Why Lisbon & IST

Hosted in Lisbon at Instituto Superior Técnico (IST), the flagship engineering school of the Universidade de Lisboa—Portugal’s largest University and one of Europe’s largest—SUSHP 2027 combines a world-class academic environment with one of Europe’s most attractive conference destinations. Lisbon’s accessibility, modern infrastructure, and reputation as a vibrant international hub consistently drive strong attendance and create an engaging setting for both formal sessions and informal networking. At the same time, IST’s internationally recognized excellence in engineering, innovation, and applied research, together with its close ties to industry and public-sector partners, ensures a technically rigorous

program and meaningful collaboration between research and practice. For sponsors, this unique combination enhances visibility, facilitates high-value connections, and provides direct access to expertise, talent, and decision-makers across the hydropower and sustainability sectors.

**By partnering with SUSHP 2027**, sponsors will engage directly with an international, multidisciplinary audience of decision-makers and practitioners, gain visibility within a highly specialized sector, and contribute to advancing more sustainable hydropower practices worldwide.

## Sponsorship Packages

### Platinum Sponsor 6.500€

- ✓ 3 complimentary full-conference registrations, including the conference dinner
- ✓ Opportunity to deliver a sponsor pitch to the full audience
- ✓ Free exhibition area (1 table, 2 chairs, electricity and Wifi access)
- ✓ Session sponsorship, including a roll-up banner on the podium
- ✓ Sponsor name displayed in the sponsored session room
